

Foundation Nation 2017 Convocation

Theme :
'Releasing the sound from the Tip of Southern Africa'

Hearing God's voice to see tangible evidence in our communities

Presented by Allen Faubion

Hearing God's voice to see tangible evidence in our communities

How do we take what we heard today, into the communities?

God has always had a way to facilitate His message. God always announces what and when He is about to do something. He would always send a prophet (someone who speaks what God says). There are variety of people who called themselves prophets.

There is a difference between a prophet (a person who God sends); as to a predictor (is a clairvoyant. It is the occultic trying to see the future with blind eyes). It begins to look at factors and calculate what is going to happen. The problem that those factors do not control what is going to happen. Only God knows what is going to happen.

When we link up with God and we move with Him we find ourselves in the position of people who now are connected with the One, who has in His hands all the factors.

Do you know how God governs the earth? In Genesis 1 – on the days of creation, day four [4], He put the grouping of the suns in the sky and in place to govern the day. He put the moon in the sky to govern the night.

He linked this with the Biblical encounter when Joshua and his men battled against the Amorites. It started getting dark. Night was going to fall and it was going to cut the victory short. Joshua called out to God, and God allowed the sun to stand still. There is scientific evidence that the phenomena occurred. Archaeologists and Physicists found the impact of this occurrence in the records.

Deborah was a warrior queen. Meaning of Deborah ‘Yahweh speaks’. She finds herself going against the invaders (Midianites). She was standing up against them and they had a major battle in the valley of Jezreel. At the end of this battle Deborah sings a new song (Judges 5). New songs come from things you see God do right in front of you. She begin to talk about how God had taken the constellations (the stars; the grouping of suns) to govern and used it in such a way that it caused a deluge of rain at the right moment and the right place.

Different kinds of sun spots and sun actions cause all kinds of natural phenomena (e.g. earthquakes). The effects of earthquakes are disastrous. In the USA the impact of the earthquakes will majorly affect places such as Los Angeles (movie industry); San Francisco (known for its technology); Seattle (Microsoft, Star Bucks). What if God pops one of those places? The Scripture says that the sun, moon and stars are in His Hand. A hand is something that controls something. As when God puts His Hand around the shofar (us), His hand control and directs our sound. If that happens the world’s economy will desperately change.

What happens when cities or buildings go down? When God moves something He has control over, it affects everything. In the USA when 9/11 happened buildings toppled and went down and 3 000 people died. This happening still rocks America today. He also referred to the devastating effects of the Tsunami that happened in 2004.

He recalled the 1st time he blew the shofar in South Africa – he was in Johannesburg to do a presentation (had all his notes prepared). He begin to hear thunder in a distance. God said to him that he will not use the presentation but should blow the shofar. He could only say a few words. He then blew the shofar (where about 400 people were gathering). Over the conference venue it started to thunder, and it became louder; lightning struck and there was a deluge of rain. It shook the place. You could tell it was localized. He continued blowing the shofar. All the people in the venue stood

up and could do nothing else and began shouting and praising God. He found out later it did not affect any other place; it happened right over their heads.

When we talk about seeing tangible, material change - we must realize that we are dealing with world systems. We are dealing with a God who knows how to take those systems down and fully plunder them. All we need to do is to listen to God's voice. He will speak and tell us what to do. He requires us to listen and obey His voice.

The Covenant Book, i.e. Book of Deuteronomy reveals how things work. Throughout the book of Deuteronomy the root word or variant for 'listen' is repeated 90 times. He explained what is required to listen to somebody. 'I have to stand before the person; look into their face and hear what the person is saying'. This is the same with God when we listen to Him, our lives change. God is not religious. When a religious system is trying to make you think that they have God - it is a lying system. Shared his plans on planting a massive church and was in the middle of the process preparing for this. Then God said to him 'it's My church, I will build it, take your hands off it, I am building it'.

God says 'Today if you hear My voice, don't harden your heart'. Voice is a sound. The very structures of our mouth all shape the sound into words. When we talk about the Word of God; it not talking of the Bible. It talks about the sound of God that comes out of His mouth, propelled forward by the breath of Holy Spirit.

When Paul talked about the Bible, the Torah – He is talking about Scriptures. The Word of God is sharper than any 2-edged sword. As recorded in the Scriptures - Hebrews 3 : 7 & 15 'If only My people will hear my voice.' Psalm 81 'If only My people will hear My voice'.

When God called His people to Sinai, He used the sound of the shofar. *God was clearing His throat*. When God calls out to introduce Himself to them, He gave them an invitation saying I want to invite all of you (2 million), to come up and meet Me face to face. Do you know what happened when they got that invitation? They said God will speak to Moses, and when he (Moses) comes back he will tell us what God said. They thought all that God was speaking was about information. It is never about information. It is all about the activation of the blessings.

They refused to meet God. Aaron told the people while waiting for Moses to come down from the mountain, to bring the gold God had given them (when they left Egypt) and threw it in the fire. They did this and out came an image of a cow (*calf sounds to cute..*). So they worshipped the image, an idol that they made and not God.

The only one who knew what God looked like was Moses. Aaron did not meet with God, so what business did he have to tell them what God looked like?

Numbers 6 records – 'makes His face to shine upon you'. When Moses came down from the mountain his face was shining. He had a face to face encounter with God, and this activated God's blessings on Moses. If you have blessings activated, 2 million people will overcome. Even though Moses never entered the promise land, there is reference of him later in the Scriptures, hence he never lost one of his promises.

This is an hour to meet our God His way. Your God has called out to you again, that is why you have attended these 2 days. The speakers heard the call and responded. God appointed this to take place now.

Over the next 24 hours, for those of you who will take it seriously what God is doing, you will hear God speak to you things that you have not imagined. Spoken by the spirit to you. God will speak to anyone that will listen to Him. That is why John said that if you do not listen, He will raise up the rocks to cry out in your place.

The shofar is the sound of God clearing His voice, and then the word comes from Him to you. When the prophets stood up and prophesied about Israel's captivity; knowing that it was not true what they prophesied, Jeremiah stood up and said 'what a great word, if only it was true!'

He shared a word for the Tribal Chiefs and Leaders that there are parts in them that must be taken out (pulled out), not only to purify them, but more so as to clarify the sound of God's voice. so that they can hear Him clearly when He speaks to them.

The world calls this day (1 April) – *April's fool day*, but today it is time to put your stake in the ground by saying 'we will be Your people, and You will be our God'.

Ever since he began to listen to God's voice, God began to say things to him that he never knew. He encouraged all to respond to God saying 'this is the day I say open my ears to hear Your voice, so that it enters my heart to remove all resistance that kept me from hearing You'. When God tells you something don't go around to others to get an interpretation. Go back to God and ask Him what He meant when He spoke to you. God may tell you just one word, but that is fine. He speaks!

He shared a testimony of a brother that was electrocuted. He was rushed to the nearest hospital Emergency Room (ER). The doctor who worked on him for 3 hours came out and told his friends that he was ready to declare the person dead.

One of the man's friends, who took him to the ER, was a lady. She asked the doctor to try one more time. She called a brother (in another area) who she knew had a shofar and told him what happened. With the Doctor's consent she then went into the ER, and stood by the man who was dead. With the phone in her hand, the man on the other side of the phone blew the shofar. A miracle happened. The dead man came back to life!

Another miracle happened - 5 Days later he walked out of hospital, and the only scar he had on his body was the mark on his hands. Inspired by this, Allen and his son produced the Mighty Shofar App. It was one of the ways God used to raise someone the dead.

See yourself as a simple crude instrument - a shofar in God's Hands. God is giving you specific times and places. Keep your eyes open; keep alert. When You see a sign, ask God what does it mean?

Faith does not come by seeing; it comes by hearing and hearing makes it possible to please God. Let God speak to you about who you are. This is a time for you to say 'God it's Your time to speak, and my ears and heart will not resist You'.

In response to sharing this, everyone who had a shofar blew it with 3 long blows (known as the Tekiah Godlah). Those who did not have a shofar clapped their hands; with the sound of the drums and shouting praises to God. Great expectation and anticipation filled the room and the people's hearts!
